GROOVY GRIP LOCKING PLIER

GO122-10

DESCRIPTION

The Grip-On Series 122 Groovy Grip Locking Plier is a versatile tool that offers a range of features to ensure efficient and comfortable operation. The longitudinal V-groove section of the plier provides three points of contact, effectively preventing lateral movement during work. The broad surface of both jaws also allows for maximum contact when clamping flat workpieces. The convex jaw design, on the other hand, helps clear small obstacles during work. The jaws are also adjustable, allowing for a precise fit and better control. Ergonomically designed, the plier offers a comfortable grip and no-pinch, easy-release operation. The concave profile also provides better push-pull capability, making it easier to work on stubborn materials. Made of superior quality, forged steel jaws, the plier also features an epoxy paint coating on its handle, which is 20 times more corrosion-resistant than nickel.

FEATURES

- Longitudinal V-Groove provides 3 points of contact.
- Adjustable jaw opening.
- Ergonomic design, comfortable handling.
- No pinch, easy release.
- Concave profile for better push-pull.
- Superior quality, forged steel jaws.
- Corrosion-resistant Epoxy paint coating.
