

## PRODUCT INFO

# SELF-LEVELING JAW CLAMP

## GO233-06

### DESCRIPTION

The Grip-On Series 233 Self-leveling Jaw Clamp is a versatile tool that is perfect for metal and frame work. Its unique design allows for hands-free operation, making it easier to focus on the task at hand. The clamp features two knurled swivel pads that provide a firm, non-slip grip even on tapered surfaces, while also preventing damage. The narrow jaw profile allows the clamp to fit into areas where C-Clamps cannot, and the adjustable jaw opening makes it suitable for a wide range of applications. The ergonomic design ensures comfortable handling, while the no-pinch, easy release feature makes it easy to use. The concave profile of the clamp provides better push-pull capabilities, and the superior quality, forged steel jaws ensure durability and long-lasting performance. Additionally, the handle is coated with an epoxy paint that is 20x more corrosion resistant than nickel, making it suitable for use in harsh environments.

### FEATURES

- Hands Free in metal and frame work.
- Narrow jaw profile fits in areas where C-Clamps cannot.
- Knurled swivel pads for no-slip and no-damage.
- Adjustable jaw opening.
- Ergonomic design, comfortable handling.
- No pinch, easy release.
- Concave profile for better push-pull.
- Superior quality, forged steel jaws.
- Corrosion-resistant Epoxy paint coating.
