REPLACEMENT CHALK LINE STRING

KSRL100

DESCRIPTION

The Keson Replacement Chalk Line String is the perfect solution for those in need of a durable and reliable replacement string for their Keson Chalk Line Reels. With a length of 33 meters (100 feet), this twisted Polyester line is stronger and more long-lasting than traditional cotton string lines. Additionally, the synthetic material of the line makes it impervious to dampness, ensuring that it can be used in a variety of weather conditions without losing its strength or effectiveness. The twisted line structure of the Keson Replacement Chalk Line String is also particularly advantageous as it is both economical and picks up and puts down more chalk than braided lines. Finally, the standard line thickness of 1-1.25mm, which is similar in size to a felt tip pen line, ensures that your chalk lines will be both precise and easily visible.

FEATURES

- 33m (100ft) in length.
- Twisted line structure.
- Made from synthetic Polyester.
- Standard line thickness - similar size to a felt tip pen line.

BARCODE: 5013579210652
