

PRODUCT INFO

HINGE BORING BIT

PG382-00

DESCRIPTION

The PG Professional Hinge Boring Bit is a versatile tool designed for woodworking tasks involving various wood types and chipboard. Its primary function is to create accurate and shallow holes, perfect for installing cupboard hinge fittings seamlessly. Crafted from durable steel, this bit ensures longevity and reliability in your projects. Also referred to as a hinge sinker or end mill, it features a centering point that aids in precise cutting, making it an essential accessory for any woodworking enthusiast or professional.

FEATURES

- Ideal for wood and chipboard.
- Creates precise shallow holes for cupboard hinge fittings.
- Durable steel construction ensures longevity.
- Also known as hinge sinker or end mill.
- Features a centering point for accurate cutting.
