

PRODUCT INFO

TCT HINGE BORING BIT

PG384-20

DESCRIPTION

The PG Professional Hinge Boring Bit is a versatile tool designed for woodworking tasks involving various materials like wood, plywood, chipboard, and hard fiberboard. With its tungsten carbide tipped design, this bit ensures precision and longevity, ideal for creating shallow yet precise holes for cupboard hinge fittings. Its hard metal construction guarantees durability, while its centering point ensures accurate cutting, making it a reliable choice for professionals and hobbyists alike. Commonly referred to as a hinge sinker or end mill, this tool is essential for seamless hinge installations.

FEATURES

- For all types of wood, plywood, chipboard and hard fibre board.
- Tungsten Carbide Tipped.
- Creates precise shallow holes for cupboard hinge fittings.
- Durable steel construction ensures longevity.
- Also known as hinge sinker or end mill.
- Features a centering point for accurate cutting.
