TRAX90XL TRACK SAW SQUARE FOR FESTOOL

BM-TSSLFT1

DESCRIPTION

StealthMounts Trax90XL allows you to instantly and securely hold your track at a 90 degree ensuring precise sheet cutting. Trax90XL provides instant material alignment for your Festool plunge saw track. Combined with integrated vacuum hose guidance, this saves time and increases cutting accuracy. Simply place the track on the material and push the 90-degree Trax90XL to align with the edge, instantly setting your track at 90 degrees and ready for cutting. The vacuum hose guides stop your hose (or power cable) catching on the edge of the track or getting in the way - smoother cutting with no more snagging. The Trax90XL slides into your Festool track and holds firmly using our unique integrated sprung slide design, no need to make any adjustments or deal with tightening clamps. Perfect for your workshop!! Manufactured in the United Kingdom, Trax90XL is made from extremely durable injection moulded ABS plastic.

FEATURES

- Lightest rail square on the market
- No setup required - easy to attach and self-aligning
- Made in Great Britain
- Track saw square made with strong injection moulded ABS plastic
- Easy to assemble onto your track
- Keep your workshop and work vehicles organised
