

## PRODUCT INFO

# MAGNETIC ANGLE FINDER

## SWAF006M

### DESCRIPTION

The Swanson magnetic angle finder is a versatile tool designed for quick angle determination on the job. It can be effortlessly attached to a straight edge or carpenter square, enabling swift layout tasks. Additionally, it serves as a handy device for determining pipe pitches. With its ball bearing construction, the angle finder ensures high accuracy. The tool features a block magnetic base and boasts a high-grade composite construction. Furthermore, it comes with a V-grooved edge, adding to its versatility and functionality. Whether you need to determine angles, facilitate layout work, or assess pipe pitches, the Swanson magnetic angle finder is a reliable and efficient choice.

### FEATURES

- Determine any angle quickly.
- Can be used with a straight edge or carpenter square for fast layout.
- Block magnetic base.
- High-grade composite construction.
- V-Grooved edge.
