

PRODUCT INFO

BATTERY BOARD FOR MAKITA LXT

BM-BDMK18H1

DESCRIPTION

StealthMounts Makita LXT Battery Boards can securely store up to three batteries. Perfect for transporting your batteries to and from the jobsite. Batteries can be mounted from either direction and won't fall out when being carried around. The board has four countersunk holes and two blind holes opening up more mounting and storage options. Two boards can be combined back to back allowing up to six batteries to be carried. Rivet our Mounting Feet to the rear of the Battery Board and hang in your workshop or tool trailer using our Mounting Cleats. Attach a Bench Belt to the rear of your Battery Board and you have instant storage and transportation for your impact driver or tape measure. Bolt to a Milwaukee or Dewalt board if you use more than one platform. Attach Mounting Feet and clip to your Packout System. The possibilities are endless. Made in Great Britain our Battery Boards are made with extremely durable injection moulded ABS plastic.
