

## PRODUCT INFO

# LOCKING C-CLAMP

### GO124-06

### DESCRIPTION

The Grip-On Series 124 Locking C-Clamp is an excellent choice for anyone looking for a versatile and easy-to-use clamp. What sets this clamp apart from the rest is that it can be operated with just one hand, making it much quicker and easier to handle than traditional bar-type clamps. The wide and deep jaw profile also allows for clamping at long distances, and the adjustable jaw opening makes it suitable for a wide range of jobs, including assembly work, mechanics work, steel fabrication, general welding, and DIY projects. Additionally, the ergonomic design ensures comfortable handling, and the clamp has a no-pinch, easy-release feature. The concave profile also offers better push-pull control, and the forged steel jaws provide superior quality. The epoxy paint coating on the handle makes it 20 times more corrosion-resistant than nickel, ensuring that it will last for years to come.

### FEATURES

- Easier and quicker: can be operated with only one hand.
- Wide & Deep jaw profile.
- Adjustable jaw opening.
- Ergonomic design, comfortable handling.
- No pinch, easy release.
- Concave profile for better push-pull.
