TABLE C-CLAMP

GO222-12

DESCRIPTION

The Grip-On Series 222 Table C-Clamp is a versatile tool that can be firmly locked or loosely attached for sliding or pivoting, making it ideal for a variety of tasks such as drilling, light milling, welding, gluing, carving, and more. With 5 holes in the base of the tool, it can be easily fixed on machinery T-Slots or on tables and workbenches. The knurled swivel pad holds tapered work without causing any damage to the pieces. The jaw opening can be adjusted according to the requirement. The ergonomic design of the tool ensures comfortable handling with no pinch and easy release. Additionally, the concave profile of the tool makes it easier to push and pull. The Grip-On Series 222 Table C-Clamp is made with superior quality forged steel jaws and has an epoxy paint coating on the handle, which is 20 times more corrosion resistant than nickel.

FEATURES

- Firmly locked or loosely attached for sliding or pivoting.
- 5 Holes in base of the tool allow for fixing onto tables.
- Knurled swivel pad for no-slip and no-damage.
- Ergonomic design, comfortable handling.
- No pinch, easy release.
- Concave profile for better push-pull.
- Superior quality, forged steel jaws.
- Corrosion-resistant Epoxy paint coating.
