

PRODUCT INFO

# ADJUST-A-CLAMP SPRING CLAMPS

## DESCRIPTION

The Pony adjust-a-clamp spring clamp offers exceptional control over the pressure applied to your projects. By simply using a screwdriver, you can adjust the clamping force between one and 50 pounds, allowing for precise control in light-duty applications. Its lightweight plastic jaws ensure durability while providing a comfortable grip. Moreover, the clamp features soft, pivoting jaw pads that securely hold objects of irregular shapes, while also offering protection to your workpieces. With this versatile clamp, you can confidently work on your projects, knowing that you have the perfect amount of pressure and reliable support for any task at hand.

## FEATURES

- Allows precise control over clamping pressure.
- Pressure can be adjusted between 1-50 lbs. with a screwdriver.
- Designed for light-duty applications.
- Lightweight plastic jaws provide durability and comfort.
- Soft, pivoting jaw pads securely hold irregular-shaped objects.
- Jaw pads also protect workpieces from damage.
