

PRODUCT INFO

FOLDABLE MEASURING WHEEL

KSRRT12M

DESCRIPTION

The RRT Series is designed for control and comfort, offering two reset options, a handle and unit housing reset, making it easier to reset than ever before. The center-line handle design ensures the unit is well-balanced. The device features a compact fold-down design that reduces its size by half using a collapsing hinge and handle lock. The 5-digit counter measures 9,999.9 meters accurately. The Enhanced Grip Pistol-type Handle increases control and comfort, while the Brake on Pistol Grip stops counting instantly, preventing accidental addition of lengths. The Gear and Shaft Transmission system provides the highest measurement accuracy and strength, without the worry of belts stretching or failing. Resetting the counter is easy with the reset option on both the handle and housing, and the housing reset is reinforced for protection.

FEATURES

- Enhanced Grip Pistol-type Handle increases control and comfort.
- Brake on Pistol Grip stops counting instantly.
- Gear and Shaft Transmission for highest measurement accuracy and strength.
- Reset on the Handle and Unit Housing no more bending over, lifting the wheel or stepping on it to reset to zero.
