

PRODUCT INFO

ALUMINIUM BOX BEAM LEVEL

SB83S-1000

DESCRIPTION

The STABILA 83 S is especially engineered for the challenging environment of building sites. Its extremely tough, cast aluminium profile ensures a long working life. Particularly practical, the horizontal vial can be read from four sides, and the vertical vials from three sides, making levelling in any position an easy task. Large finger-grip openings allow for easy and comfortable use. The spirit level features two precision-milled measuring surfaces and a continuous bridge over the horizontal vial for increased stability. The electrostatic powder coating allows for easy cleaning, and STABILA installation technology guarantees high-precision measuring in all positions with long-term accuracy.

FEATURES

- Extremely tough cast aluminium profile.
- Horizontal vial readable from 4 sides; vertical vials from 3 sides for quick readings.
- Large finger-grip openings for comfortable use.
- Spirit level with two precision-milled measuring surfaces.
- Continuous bridge over horizontal vial for increased stability.
- Easy cleaning due to electrostatic powder coating.
- Stabila installation technology ensures long-term accuracy.
- Includes 1 horizontal vial, 2 vertical vials, 2 milled measuring surfaces, and finger-grip openings.

BARCODE: 4005069025465

LENGTH: 1000mm (40")

WIDTH: 62mm

DEPTH: 29mm

VIALS: 3

COLOUR: Yellow

MATERIAL: Aluminium

MAGNETIC: No

ACCURACY:

Normal Position: 0.5 mm/m

Reverse Position: 0.5 mm/m

WEIGHT: 1485g
