

## PRODUCT INFO

# TRAX90 TRACK SAW SQUARE FOR MAKITA

### BM-TSSSMK1

## DESCRIPTION

StealthMounts Trax90 allows you to instantly and securely hold your track a at a 90 angle ensuring precise sheet cutting. Trax90 provides instant material alignment for your Makita plunge saw track. Combined with integrated vacuum hose guidance, this saves time and increases cutting accuracy. Simply place the track on the material and push the 90-degree Trax90 to align with the edge, instantly setting your track at 90 degrees and ready for cutting. The vacuum hose guides stop your hose (or power cable) catching on the edge of the track or getting in the way - smoother cutting with no more snagging. The Trax90 slides into your Makita track and holds firmly using our unique integrated sprung slide design, no need to make any adjustments or deal with tightening clamps. Perfect for your workshop!! Manufactured in the United Kingdom, Trax90 is made from extremely durable injection moulded ABS plastic.
