

PRODUCT INFO

TCT MASONRY DRILL BITS

SF SERIES

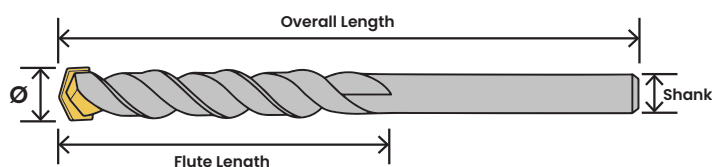

DESCRIPTION

Sutton Tools TCT Masonry Drill Bits offer tradesman quality and efficiency for drilling into natural and artificial stone, masonry, brickwork, and concrete. Featuring a Tungsten Carbide percussion tip with a semi-positive profile, they achieve 25% faster drilling. The Tungsten Carbide cutting edges ensure high wear resistance, while the rolled double spiral flute enhances dust extraction, tripling drill life. A unique brazing process secures the tip to the body, and the parallel shank supports rotary hammer and percussion drilling. An ISO 14001 sandblasted finish guarantees zero heavy metals.

APPLICATION

Ideal for drilling into natural and artificial stone, masonry, brickwork, and concrete.

SKU	BARCODE	DIAMETER	OVERALL LENGTH	FLUTE	SHANK	QUANTITY	PACKAGING	WEIGHT
