

PRODUCT INFO

HSS STEP DRILL BIT

FAISD620

DESCRIPTION

Faithfull HSS Step Drills are indispensable tools for precision hole-cutting tasks. Crafted from robust High Speed Steel (HSS), these drills effortlessly handle materials up to 4mm in thickness. Their unique design allows users to cut multiple hole sizes without the need for constant bit changes. With parallel holes in 2mm increments, they offer exceptional versatility, making them ideal for various applications. It's advisable to use cutting fluid for smoother operation, ensuring the longevity of these reliable tools. With a range spanning from 6 to 20mm and a step depth of 4mm, these step drills are the perfect choice for those seeking precision, efficiency, and durability. The 8mm shank provides stability and ease of use, making Faithfull HSS Step Drills a must-have for any professional or DIY enthusiast.
