

PRODUCT INFO

FATMAX® TRADELIFT™

STFMHT83550

DESCRIPTION

The STANLEY® FATMAX® TradeLift™ is a versatile handheld tool for lifting, leveling, holding and spreading of heavy or awkward objects such as appliances, sheet materials or furniture – a real life saver when you're working alone. Engineered for safety, this professional, heavy-duty tool enables easy hands-free lifting up to 150kg, to a maximum height of 220mm. The TradeLift™ is perfect for jobs like hanging doors, installing kitchen cabinets and appliances and fitting windows in all environments, with enclosed metal plate housing to enhance durability and prevent dust entering the tool. The robust lifting tool can be operated by hand or foot, with an ergonomic overmoulded handle providing extra grip, comfort, and control. A fine adjuster lowers the load by up to 2.5mm per toggle for precision levelling and spacing, with a full release button safely recessed to avoid accidental activation. The large base plate with angled edge slides easily under low objects and reduces the risk of tipping, with four screwholes countersunk into the base to anchor the lift for maximum stability.

FEATURES

- Up to 150kg lifting force with up to 220mm lifting capacity.
- The reinforced push-down lever can be used by foot for hands-free operation.
- Four countersunk screw holes ensure the tool can be anchored securely.
- Angled edge: allows the tool to slide under low objects.
- Fine Adjuster: Lowers the lift plate by up to 2.5mm per toggle for fine adjustments when leveling.
