

PRODUCT INFO

XLT™ BENT LONG NOSE PLIER CHE388

DESCRIPTION

These Combination Angled Long Nose Pliers offer a longer, streamlined design for precision handling and feature Xtreme Leverage Technology (XLT™). XLT™ positions the rivet closer to the cutting edge, requiring less force than other high leverage designs. State-of-the-art laser heat treating creates a strong, consistent pattern across the cutting edge, adding strength and longevity. Crosshatch jaws provide maximum grip and durability. A 35-degree angled nose allows access to hard-to-reach areas, and a precision-machined knife-and-anvil cutting system ensures perfect mating. Made in the USA, forged from high carbon U.S. steel with ultimate rust prevention.

FEATURES

- Angled head at 35-degrees for hard-to-reach areas.
- Longer, streamlined design for precision handling.
- Sleek, lightweight and includes an additional pipe grip feature.
- XLT™ increases performance and reduces hand fatigue.
- Laser heat-treated cutting edges perform better and last longer.
- Crosshatch teeth to provide maximum grip.
- Precision-machined knife and anvil style cutting edges ensure perfect mating for superior performance and longevity.
- Forged high carbon U.S. steel for strength & durability.
- Channellock blue grips for comfort.
