FLUTED RUBBING BRICK

NRBF28

DESCRIPTION

The Norton Fluted Rubbing Brick stands as a versatile tool for masons and stone workers, featuring a hard, extra coarse silicon carbide abrasive designed for heavy-duty applications. Its diagonal flute design imparts sharp edges, ensuring a clean shearing action during concrete rubbing and mold mark removal. Ideal for general cleanup, this rubbing brick excels in smoothing, shaping, and cleaning a range of surfaces including bricks, concrete, concrete blocks, ceramic tiles, and other masonry products. Whether used wet or dry, it proves invaluable in tasks such as cleaning demolition bricks, edge smoothing cut tiles, and finishing concrete formwork, showcasing its adaptability and reliability.

FEATURES

- Hard, extra coarse silicon carbide rubbing bricks are used for heavy-duty applications.
- Fits comfortably in your hand.
- Diagonal flutes provide sharp edges and a clean shearing action.
- Great for general clean up.
- Used by masons and stone workers for rubbing down concrete and removing mold marks.
