TCT MASONRY DRILL BITS

DB SERIES

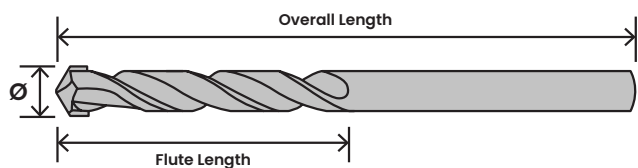

DESCRIPTION

PG Professional Carbide Tipped Masonry Drill Bits boast a Tungsten Carbide Tipped point with dual cutting edges, ensuring efficient drilling in tough materials. The Tungsten Carbide cutting edges offer exceptional wear resistance, ideal for drilling through brick walls, stone, rock, granite, cement, marble, and tiles. Crafted with a length of 400mm, perfect for drilling deeper holes. Designed with a parallel shank for rotary hammer and percussion drilling, these drill bits meet DIN 8039 specifications, guaranteeing reliability and precision for a wide range of masonry drilling applications.

APPLICATION

Ideal for drilling brick walls, stone, rock, granite, cement, marble and tiles.
