

PRODUCT INFO

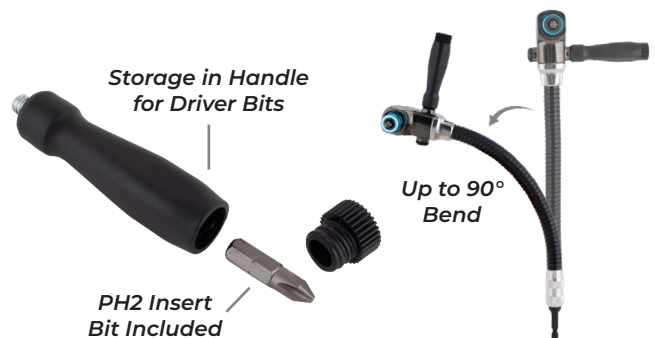

FLEXIBLE ANGLE DRIVER

GFB490

DESCRIPTION

The GFB Flexible Angle Driver is an exceptional tool for tight workspaces, offering a flexible shaft that bends up to 90 degrees to reach challenging angles. Its ergonomic handle design accommodates both left and right-handed users, providing comfort and control. The driver features a magnetic, quick-release anti-jamming mechanism for fast, secure bit changes with 1/4" hex shank bits. With an added 300mm length, it extends your reach effortlessly. Built to endure impact drivers, it boasts robust metal housing and steel gears for durability. Additionally, the handle includes storage for extra bits, and the driver comes with a Phillips Insert Bit (PH2 x 25mm) for added convenience.
