

PRODUCT INFO

INSULATED CROWBAR

FAICROW60-INS

DESCRIPTION

The Faithfull Insulated Crowbar is a versatile and safety-focused tool, featuring a chisel on one end and a pointed tip on the other. Designed to meet the stringent standards of BS8020:2002, it is specifically crafted for use in proximity to live cables. Each crowbar undergoes individual testing, ensuring it can withstand up to 10,000 volts, with a guaranteed safety margin of 1,000 volts. Weighing 6 kilograms (13 pounds) and extending to a length of 1.55 meters (61 inches), this robust tool provides both reach and heft for various tasks. With a shank diameter of 32 millimeters, the Faithfull Insulated Crowbar is an indispensable, secure companion for electricians and utility workers, ensuring the utmost protection in high-voltage environments.

FEATURES

- Chisel on one end and a pointed tip on the other.
- Individually tested to withstand 10,000 volts, guaranteed for 1,000 volts.
- Offers a generous length of 1.55 meters for extended reach.
- Robust shank with a diameter of 32mm.
- Essential tool for electricians and utility workers working in high-voltage environments.
