SATELLITE MEASURING TAPE

FS30SME

DESCRIPTION

The Fisco Satellite Long Measuring Tape is a durable and reliable measuring tool made in Britain. The tape features a “Matt Coat” tough, white polyester coated steel tape that is resistant to commonly used solvents and abrasion. The tape is double-sided, allowing for metric and imperial markings, and is accurate to EC Class II standards. On one side, it is graduated in millimeters and numbered every 10mm, with red meters and repeats, while on the other side, it is graduated in feet, inches, and 1/8”, with red feet, repeats, and 16” joist markings. The tape is housed in an impact-resistant molded ABS case, which is ultrasonically welded for added strength. It also has an easy-winding, high-impact polymer center with a push-button opening handle, allowing for neat storage of the tape. The case is fitted with an ABS belt clip on the rear, and the tape is fitted with a unique triple-action end-loop with a fold-in claw that enables the tape to be anchored into or over a wide variety of objects and surfaces.

FEATURES

- Polyester coated steel blade, accurate to EC Class II.
- Made in Britain.
- Impact resistant moulded ABS case, ultrasonically welded for added strength.
- Easy winding, high impact polymer centre with push button opening handle.
- Unique triple action end-loop with fold-in claw.
- ABS belt clip moulded on to the rear of case.

BARCODE: 5013623305976

BLADE LENGTH: 30m/100ft

BLADE WIDTH: 10mm

GRADUATIONS: mm/inch

EC ACCURACY CLASS: II

BLADE TYPE: Polyester coated steel

DIMENSIONS: 120mm x 120mm x 35mm

WEIGHT: 422g
