LASHING STRAP

FY123-8

DESCRIPTION

Our Fasty straps are the ultimate solution for all your securing needs at home, thanks to their user-friendly design and impressive durability. With endless applications, our straps can hold, secure, load, and tie together anything you need, giving you peace of mind that your items are safe. The straps are 25mm wide and have a remarkable strength of 400kg, and come in a variety of lengths and colors to suit your specific needs. The buckles are made of steel with a high zinc/nickel anti-corrosion coating, making them considerably stronger and lighter than standard zinc cast buckles on the market. Additionally, the large opening on the buckles makes threading the strap through much easier, even when wearing gloves. Our straps are made of High Tenacity PolyPropylene, which makes them incredibly durable and UV-resistant, with high strength and color resistance. And, when you're done with them, they're 100% recyclable. Proudly made in Sweden.

FEATURES

- High durability and strength with a 400kg capacity.
- User-friendly design for easy handling and secure fastening.
- Eco-friendly and 100% recyclable material.
- Steel buckles with high zinc/nickel anti-corrosion coating.
- Versatile straps with endless applications for home, work, and outdoor use.
