

PRODUCT INFO

TANGED HORSE RASP

SN350HOR

DESCRIPTION

P&N Horse Rasps are expertly crafted tools designed for optimal performance in horse shoeing. Each rasp features double-ended rasp teeth on one side for rapid stock removal and file teeth on the other, ideal for shaping and smoothing. Made from high-carbon steel, these rasps are durable and reliable, catering to both professional farriers and DIY enthusiasts. The strong tang fits all P&N file handles, ensuring a secure grip. With a special rasp cut formation, these tools efficiently remove material from softer surfaces like wood and leather, making them an essential addition to any toolkit.

FEATURES

- Double-ended rasp teeth on one side, file teeth on the other.
- Ideal for shoeing racetrack and riding horses.
- Professional-grade precision, made for lasting performance.
- Special rasp cut for rapid material removal from wood or leather.
- Made from high carbon steel for durability
- Strong tapered tanged end for handle attachment.
