300mm PIPE SAW BLADE

TMXP30

DESCRIPTION

Introducing the Topman Pipe Saw Replacement Blade, designed for precision and efficiency. Crafted at 300mm length with 17 teeth per inch (tpi), it ensures swift, accurate cuts through PVC pipe, plastic, and bamboo, catering to the needs of plumbers and electricians alike. This blade boasts a pull-stroke action, enhancing cutting speed and accuracy. Its innovative Japanese saw tooth design prevents clogging, thanks to its impulse-hardened edges, ensuring durability and prolonged sharpness. The screwknob interchangeable system facilitates easy attachment, while the surface treatment with Ni-P plating prevents rust, ensuring longevity and reliability for every task at hand.

FEATURES

- Great for PVC pipe, plastic, bamboo cutting, plumbers and electricians.
- High quality flexible & durable thin blade.
- Clean, accurate and controlled cuts.
- Diamond ground and impulse hardened teeth.
- Rust resistant.
- The best selling pull stroke saw!
