GUARDED BRICK BOLSTERS

DESCRIPTION

Footprint Brick Bolsters are a trusted tool used by professional tradesmen worldwide for cutting brick. The manufacturing process involves 14 meticulous steps to transform high-quality carbon steel into a Footprint standard Brick Bolster. The bolster is drop hammer forged from head to blade, resulting in superior strength. The blade is hardened and tempered to ensure a long cutting life. The domed head is designed to delay the onset of mushrooming and splintering that may occur after repeated use, and it also prevents the hand guard from sliding up and off the handle after repeated blows. The tapered neck is engineered to prevent snapping at the weakest point on the bolster. The 4.5" blade has additional strengthening ribs down the sides and the center, providing extra strength when cutting larger bricks and blocks. Additionally, the high-quality EVA plastic hand guard protects the hand from glanced blows. Proudly made in Sheffield, Britain, Footprint Brick Bolsters are a high quality tool that delivers superior performance and durability.

FP1237-075

BARCODE: 5013579110112
BLADE WIDTH: 75mm (3")
BLADE THICKNESS: 8mm
LENGTH: 220mm (8.5")
CHISEL COLOUR: Blue
GUARD COLOUR: Red
WEIGHT: 861g

FP1237-100

BARCODE: 5013579110129
BLADE WIDTH: 100mm (4")
BLADE THICKNESS: 8mm
LENGTH: 235mm (9.25")
CHISEL COLOUR: Blue
GUARD COLOUR: Red
WEIGHT: 974g

FP1237-113

BARCODE: 5013579110136
BLADE WIDTH: 114mm (4.5")
BLADE THICKNESS: 10mm
LENGTH: 245mm (9.5")
CHISEL COLOUR: Blue
GUARD COLOUR: Red
WEIGHT: 1217g
