

PRODUCT INFO

LONG-CUT AVIATION SNIP

MW6716-A

DESCRIPTION

MIDWEST® POWER CUTTER® Long-Cut Aviation Snips feature a 3" length of cut for fewer rebites when cutting long sheets of thin material, as well as a wide opening for cutting vinyl siding nail lip and ribbed roofing material. Use in either hand. These snips feature GLIDETECH® FORGED BLADES: unequalled strength, longest lasting edge life, and the most precise cutting action. Blades are hot drop forged of molybdenum alloy steel and Austemper® heat-treated to best accept and hold their precision ground cutting edge. Blades cut complete from "pinch of the blades through their points" and pivot on a Grade 8 bolt that is threaded and affixed into the bottom blade keeping blades in precision adjustment, and if ever necessary, allowing them to be readjusted extending peak performance. Equipped with KUSH'N-POWER® compound leverage handle action which multiplies handle force while providing a soft, sturdy and comfortable grip. Made in USA!

Cutting Capacity:

20ga cold rolled steel, and 24ga stainless.
