

PRODUCT INFO

SCUTCH COMBS AND DROVES

DESCRIPTION

The Footprint Scutch Comb and Drove bits are designed to be inserted into Scutch Chisels, Scutch Hammers, or SDS Scutch Chisels. These bits are commonly used in cutting and shaping stone and brick work, making them ideal for masonry applications. Made from hardened and tempered steel, they offer exceptional strength and durability to withstand heavy use. Additionally, the zinc coating on these bits helps prevent rust, wear, and tear, ensuring their longevity. Each pack comes with 5 bits, providing ample supply for various projects. Manufactured in Sheffield, Britain, these Footprint Scutch Comb and Drove bits are renowned for their quality and craftsmanship, making them a reliable choice for masonry professionals and DIY enthusiasts alike. Available in a toothed edge or smooth edge.

FP5781
