STRAIGHT JAW LOCKING PLIER

112 SERIES

DESCRIPTION

The Grip-On Series 112 Straight Jaw Locking Pliers are an excellent choice for heavy-duty jobs in a variety of settings, whether you're working on a car, in a garage, workshop or factory. The heavy-duty jaws of these pliers have an excellent capacity to handle even the most difficult tasks. The reinforced precisely machined teeth ensure a secure grip for those extra tough jobs. The pliers have an adjustable jaw opening and an easy release lock to make it simple to use. The ergonomic design of these pliers makes them comfortable to handle, with no pinch and an easy release function. The concave profile of the pliers provides a better push-pull function. The superior quality, forged steel jaws ensure durability and longevity, and the epoxy paint coating on the handle makes them 20x more corrosion resistant than nickel. Available in two sizes: 190mm & 240mm.
