GAUGING TROWEL

RG129-175

DESCRIPTION

The Ragni Gauging Trowel is made with a well-balanced carbon steel blade, which has been hardened and tempered for extra strength and durability. It's soft grip handle makes it more durable and comfortable to hold. It also helps to prevent muscle fatigue, allowing you to work longer. This gauging trowel is ideal for measuring, mixing, and applying small quantities of cement and is great for small plastering or cementing jobs in confined spaces.

FEATURES

- Designed for measuring and mixing plaster or mortar.
- Can be used to apply mortar in awkward spaces.
- Steel blade with hardened edges for added strength and durability.
- Well-balanced.
- Non-slip handle with finger guard.
- 3 year guarantee.
