## MARKING GAUGE

### FP1258

#### DESCRIPTION

The Footprint Marking Gauge is an indispensable tool for any woodworking project requiring precision markings. Its primary function is to mark a line parallel to a straight edge before chiseling, cutting, or sawing. The gauge is made with a hardened steel pin that provides a long life and is suitable for use on various types of wood. The tool's head and stem are crafted from sturdy, hard-wearing beechwood, ensuring durability during use. The easy twist plastic thumb screw allows for the adjustment of the stem and head, providing precise control over the markings. The Footprint Marking Gauge is manufactured in Sheffield, Britain, a city renowned for its manufacturing and steelworking heritage. With all of these features, the Footprint Marking Gauge is a reliable tool that any woodworker can rely on to make accurate markings on their woodworking projects.
