

## PRODUCT INFO

# SCREW EXTRACTORS

### DESCRIPTION

Introducing Draper Screw Extractors, the ultimate solution for effortlessly tackling broken studs, bolts, and screws. Crafted from premium German chrome vanadium steel, these extractors boast square drive ends for maximum durability. Heat-treated and featuring a meticulously rolled thread, the shaft is impeccably smoothed for optimal performance. Designed with versatility in mind, these extractors are equally adept at removing broken and rusted galvanized pipes from fittings. Using them is a breeze – simply center punch with a hammer, drill a central hole in the workpiece, insert the extractor into the tool holder, and slowly screw counter-clockwise into the workpiece. Trust Draper for precision, reliability, and ease of use. Available in 2 sizes: No.7 and No.8.
