

PRODUCT INFO

ADJUSTABLE COUNTERSINK WITH DEPTH GAUGE

DESCRIPTION

The GFB Adjustable Countersink with Depth Gauge is designed to deliver precision and efficiency, perfectly matching the depth of your job every time. Its ball bearing depth stop features a protective rubber rim to prevent marking, while the extra-wide clearance ensures no jamming. The tool includes a bonus pilot drill bit and an Allen Key for added convenience. With a quick-change 1/4" hex shank and a tungsten carbide cutting edge, it provides a cleaner cut. Ideal for use on hardwood, softwood, pine, MDF, particle board, and cement sheets, it drills screw pilot holes and countersinks in one action, perfect for both trade professionals and home handymen.
