

PRODUCT INFO

RETRIEVING TOOL

BY1794

DESCRIPTION

This Bailey Retrieving Tool has been specifically designed to retrieve lost drain rods or tools within drain pipes. By slowly turning the retrieving tool clockwise around the lost rod, the tool will lodge itself into its coils, allowing it to then be extracted back toward the operator. Made from solid brass, ensures strength and durability during use. Has also been fitted with a Lockfast joint which offers more security to the connection of the drain rod as the joint is secured with a locking nut. The connection can't come undone whichever way the rods are turned. For use with Bailey Blue Rods®.

FEATURES

- Brass threaded lock fast fitting for secure attachment.
- Easy to use coiled head.
- Chamfered end to easily position around object being retrieved.
- Direct secure connection to drain rod.

USE WITH

Bailey Blue Rods®
(MM1219, MM1222, MM1819,
MM1922)
