

## PRODUCT INFO

# CROSS CHECK LEVEL

## SWCCL001

### DESCRIPTION

The Swanson Cross Check Level is a pocket-sized, precision accurate tool designed for various applications. With its durable composite housing and precision accurate vials, this cross check level is suitable for adjusting machine tools, scales, pool tables, furniture, telescopes, transits, and photo/video equipment. The level features two vials set at right angles to each other, providing a simple and efficient way to confirm the levelness of your piece or item on both planes without the need to reorient it. Additionally, the level comes with two mounting holes, enabling quick and secure attachment to any surface area, ensuring you obtain an accurate reading every time you use it.

### FEATURES

- High-impact composite construction.
- 2 fastening holes for mounting or string level capability.
- Level anything quickly: tools, tripods, campers etc.
- Economical and convenient, fits in your pocket or tool pouch.
- 2 easy-to-read vials.
