

PRODUCT INFO

FLOW RATE CUP TESTER

PT7276

DESCRIPTION

The Plumtest Flow Rate Cup Tester is an essential tool for measuring water flow rates, ranging from 0 to 17 litres per minute. Easy to use, it works by simply twisting the cup until the water inside reaches a constant level. Also known as a weir cup, it helps determine if sufficient water flow is available before plumbing installations. Perfect for testing taps, showers, or boundary boxes, it's also suitable for measuring the flow of other fluids.

FEATURES

- Measures flow rates from 0 to 17 litres per minute.
- Ensures sufficient water flow before plumbing installation.
- Easy to use and reliable.
- Ideal for testing taps, showers, and boundary boxes.
- Suitable for measuring water and other fluids.
