

PRODUCT INFO

STAINLESS STEEL JOINTING KNIVES

DESCRIPTION

These professional Ragni jointing knives has a top-grade Japanese stainless steel blade which has been heat treated. This offers increased durability, strength, longer life, resists rusting, and great flexibility while operating. This joint knife can be used for working with putty or scraping paint. It's handle has a strong metal cap, allowing for the handle to be hammered and there are 3 hidden rivets securing the blade, adding strength when hammering the handle. Two sizes are available: 125mm & 150mm.
