

PRODUCT INFO

GLASS & TILE DRILL

DESCRIPTION

The GFB Glass & Tile Drills are crafted for precision and durability, featuring four sharp cutting blades that deliver clean cuts for optimal plug fitting and efficient dust removal. With a 1/4" Quick Change Shank, these drills integrate seamlessly with drill drivers and impact drivers, enhancing versatility and convenience. Made from high-tensile steel, they are engineered for industrial toughness and precision, making them ideal for drilling through ceramic tiles, fibreglass, and glass. For best results, always use lubrication when drilling to achieve a smooth, even finish and to extend tool life.

FEATURES

- 4 precision cutting blades for clean, accurate cuts & better plug fitting.
- 1/4" Quick Change Shank for easy use with drill and impact drivers.
- Suitable for ceramic tiles, fibreglass, and glass.
- High-tensile steel construction for industrial durability and precision.
- Use lubrication when drilling for a smooth, even finish.
- Industrial Tough - Precision Design.
