HSS TITANIUM DRILL BITS

DR202 SERIES

DESCRIPTION

Draper HSS Titanium Drill Bits embody durability and precision. Crafted from high-speed steel and coated with Titanium nitride, they offer exceptional strength and a longer lifespan. Fully ground with a 135° split point, these bits ensure precise centring and clean drilling. For optimal performance, they're best used with a cooling agent, maintaining their integrity during intense work. Versatile, they're suitable for steel, non-ferrous metals, wood, and hard plastic applications. With compatibility for a standard 10/13mm chuck and adherence to manufacturing standards like DIN338 and DIN1414-2, Draper's drill bits stand as reliable tools for various drilling needs.
