

PRODUCT INFO

DIGITAL MANOMETER

PT1608

DESCRIPTION

The Plumtest Digital Manometer is a reliable tool for measuring pressure or vacuum in kPa, perfect for appliance and line testing up to 15 kPa within 1% accuracy. Easy to use, it includes a hose for immediate operation. Additional features include a backlight for low-light environments, auto power-off to conserve battery, and magnets with a hook on the back case for secure placement during testing. This compact, versatile device ensures precision and convenience in every testing scenario.

FEATURES

- Measures pressure or vacuum up to 15 kPa.
- Suitable for appliance and line testing.
- Within 1% accuracy.
- Includes a hose for immediate setup.
- Backlight for improved visibility in low-light conditions.
- Auto power off after 20 minutes to conserve battery life.
- Magnetic back & hook for secure attachment during use.

BARCODE: 934-8099001067

SENSOR TYPE: Temperature-compensated solid state

CONNECTOR TYPE: 5/16" Barb Fitting

HOSE LENGTH: 800mm

RANGE: +/-15 kPa

OVER PRESSURE: +/- 30 kPa

OPERATING TEMPERATURE: -10° to 50°C

POWER SUPPLY: 9V Alkaline (Included)
