

PRODUCT INFO

THUMBTURN PATTERN PIPE WRENCH

DESCRIPTION

The Footprint Thumbturn Pattern Pipe Wrench is an innovative tool that makes adjusting the jaw size effortless. With the thumbturn adjustable nut, users can quickly and easily adjust the size of the jaws with just one hand, eliminating the need to unscrew the screw slide the jaws up and down, and then re-screw the screw into the frame. The knurled thumbturn nut makes adjusting the wrench even easier, providing a secure grip for the user. As more pressure is exerted, the wrench grips the workpiece tighter, ensuring a secure and stable hold. With machine ground and precision-hardened teeth, wear is minimized, and the wrench lasts longer. The Footprint Thumbturn Pattern Pipe Wrench features a drop-forged hook and pressed steel handle, making it durable and robust. This versatile tool is used throughout the world by plumbers, gas fitters, farmers, industry, and utility companies. Made in Sheffield, Britain. Available in 3 sizes: 175mm, 225mm, and 300mm.

FP900-175
