PACER MEASURING TAPE

FS100P

DESCRIPTION

The Fisco Pacer Long Measuring Tape is a heavy duty, high specification open frame tape designed for the professional user. This tape measures 100 meters in length and 13mm in width. The tape is made from a “Matt Coat” tough, white polyester coated steel material that is resistant to commonly used solvents and abrasion, ensuring it can withstand harsh working environments. It is also accurate to EC Class II, graduated in mm, numbered in cm every cm, and marked with red metres and repeats. The tape is made in Britain and features an impact-resistant ABS frame with an integral ground spike, and a tough, high-impact polymer center that offers additional strength to the winding mechanism. The low friction bearing ensures smooth rewind, while the long winding lever and easy-grip knob make rewinding fast and effective. Finally, the tape features a corrosion-resistant end-piece with a pressed steel end-loop fitted with a stainless steel claw.

FEATURES

- ‘Matt Coat’ polyester coated steel, accurate to EC Class II.
- Made in Britain.
- Impact resistant ABS frame with an integral ground spike.
- Tough, high impact polymer centre offers additional strength to the winding mechanism.
- Low friction bearing for smooth rewind.
- Long winding lever and easy-grip knob makes rewinding fast and effective.
- Corrosion resistant end-piece.

BARCODE: 5013623305631

BLADE LENGTH: 100m

BLADE WIDTH: 13mm

GRADUATIONS: mm

EC ACCURACY CLASS: II

BLADE TYPE: Polyester coated steel

DIMENSIONS: 350mm x 265mm x 50mm

WEIGHT: 1952g
