

Drill Powered Pump

Perfect in Household Emergencies

BOATING

CAMPING

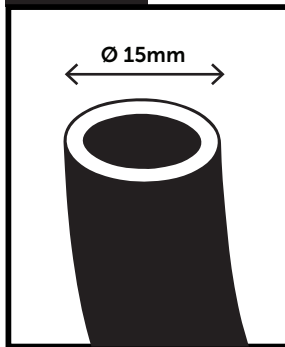

WATER TANKS

PONDS & WATER
FEATURES

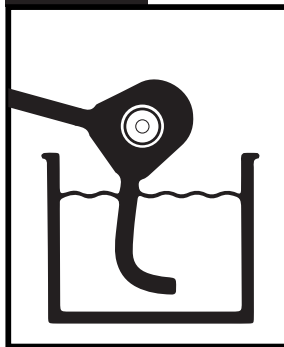

Operating Range: 1,800 to 2,600 Revs Per Minute (RPM). Maximum RPM: 2,600.
Maximum Pumping Depth is 3 Meters.

STEP 1

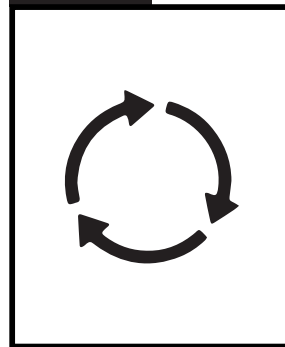

Use with 15mm diameter hoses.

STEP 2

All air pockets must be expelled from the intake hose. Full length of intake hose must be fully submerged before starting pump.

STEP 3

Only operate in a clockwise direction.

STEP 4

After use, wash the pump well with water.

Warning!

- Do not use with flammable or corrosive materials.
- Do not let the pump run dry! Turn off immediately when container is dried (pump becomes inoperable if run dry).

Pumping Rates:

- 1M depth: 1300 lts/hr
- 2M depth: 1200 lts/hr
- 3M depth: 1000 lts/hr
