

PRODUCT INFO  
**CHALK LINE REEL SET**  
**KSK1CB**

**DESCRIPTION**

The Keson Chalk Line Reel with Blue Marking Chalk Set is a must-have tool for carpenters and construction workers alike. The Aluminium Chalk Line Reel is compact, lightweight, and can hold about 2-3oz of chalk, making it perfect for marking straight lines accurately. Its synthetic (Poly) line is stronger and more durable than other lines, and its twisted line structure is economical and picks up more chalk, putting down more chalk than braided lines. The set comes with Keson ProChalk<sup>®</sup> Standard Blue Marking Chalk, a high-quality marking chalk made in the USA. This chalk is perfect for interior layout, roofing, siding, and paneling, both for interior or exterior use. Its permanence ranking of 1 ensures that it will not leave behind any residue, making it ideal for surfaces that need to be kept clean. The 113g (4oz) bottle is easy to carry around and use on any job site. In conclusion, the Keson Chalk Line Reel with Blue Marking Chalk Set is a reliable and practical choice for anyone in need of high-quality marking chalk and a straight chalk line.
