

PRODUCT INFO

DOUBLE WORM SCREW

MM1230

DESCRIPTION

The Bailey Double Worm Screw is designed to remove obstructions within drain pipes. The worm screw pierces through blockages such as paper or rags allowing the offending material to be dragged back toward the operator. This worm screw has been made from solid brass to ensure strength and durability during use. Has also been fitted with a Lockfast joint which offers more security to the connection of the drain rod as the joint is secured with a locking nut. The connection can't come undone whichever way the rods are turned. For use with Bailey Blue Rods®.

FEATURES

- Great for clearing obstructions in drains.
- Easy to use.
- Direct secure connection to drain rod.
- Fitted with a Lockfast joint.
- Made from solid brass.
