

PRODUCT INFO

RIGHT AVIATION SNIP

MW6716-R

DESCRIPTION

MIDWEST® Right Cut Aviation Snips are ideal for trimming metal and other sheet materials. Used for cutting straight or wide right curves. Best used in left hand. These snips feature GLIDETECH® FORGED BLADES: unequaled strength, longest lasting edge life, and the most precise cutting action. Blades are hot drop forged of molybdenum alloy steel and Austemper® heat-treated to best accept and hold their precision ground cutting edge. Blades cut complete from “pinch of the blades through their points” and pivot on a Grade 8 bolt that is threaded and affixed into the bottom blade keeping blades in precision adjustment, and if ever necessary, allowing them to be readjusted extending peak performance. Equipped with KUSH’N-POWER® compound leverage handle action which multiplies handle force while providing a soft, sturdy and comfortable grip. Made in USA!

Cutting Capacity:

18ga cold rolled steel, and 22ga stainless
