DIY VERNIER CALIPER

SL202-105

DESCRIPTION

The Faithfull DIY Vernier Caliper is a versatile and durable tool manufactured from steel, designed to meet the needs of both metric and imperial measurement systems. With its dual reading capabilities, it provides the user with precise and efficient measurements, offering a maximum capacity of 125mm or 5 inches. Its three-way measurement facility allows for external, internal, and depth measurements, making it a versatile choice for various DIY projects. The sliding thumb-lock feature ensures that measurements can be quickly and accurately obtained, enhancing the user's precision. Whether you prefer the metric or imperial system, this caliper's dual reading and locking function make it a handy and essential tool for any DIY enthusiast.

FEATURES
