

PRODUCT INFO

# CORNER EASING PLANE

## AJP70748

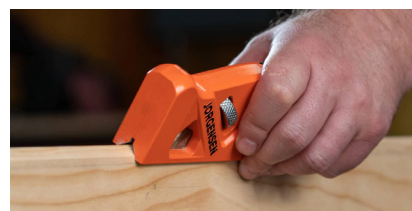

### DESCRIPTION

The Jorgensen corner easing plane can make quick work of edge relief. Made from high-grade die-cast aluminum alloy and precisely machined, it's durable and provides great corner finish results. The large thumbwheel on the product is easily and precision adjusted the cut depth. Hardened O1 steel blade is sharp and durable. Set is included with one 45° chamfer blade and 3 pack of 3mm (1/8"), 5mm (3/16"), 6mm (1/4") radius blades, to allow for cutting out different edge shapes. Built in blade storage on the handle.
