

PRODUCT INFO

FUTURA MEASURING TAPE

FS-FT30

DESCRIPTION

The Fisco Futura Long Measuring Tape is a high-quality measuring tool that boasts an impressive set of features. This highly flexible fibreglass tape has a durable PVC overcoating that provides superior resistance to scuffing and marking, ensuring that it maintains its accuracy over time. Measuring 30 meters in length and 13mm in width, this tape is graduated in millimeters and numbered in centimeters every centimeter, with red meters and repeats, making it accurate to EC Class II standards. Its ergonomic closed case design features an ABS case with an integral hand grip, keeping fingers clear of the winding lever. Additionally, it has an easy winding, high impact polymer center and a corrosion-resistant end-piece, with a pressed steel end-loop fitted with a stainless steel claw. Also features an ABS belt clip molded onto the rear of the case, making it easy to carry around and use on the go.

FEATURES

- PVC overcoated fibreglass tape, accurate to EC Class II.
- Made in Britain.
- Distinctive ABS case with an integral hand grip to keep fingers clear of the winding lever.
- Easy winding, high impact polymer centre.
- Corrosion resistant end-piece.
- ABS belt clip moulded on to the rear of the case.
